

8" CASSETTE Carts 4 nests or 6 nests

Vibration testing

A deep understanding of vibration control allows Palbam Class to offer unique solutions. This graph shows the damping effect of this anti-vibration shelf (red-line) when compared to a regular shelf (black line).

This Cart has been designed with an anti-vibration shelf. The model shown is for transporting open wafer cassettes. Open cassettes required a different solution from the standard wafer box carts shown previously. Palbam Class, together with an engineering expert in vibration damping has developed this unique solution.

This unique anti vibration shelf cart can be adapted to transport **any sensitive product**. Let us know your special requirements and allow the expertise of Palbam Class to devise you a solution.

Product	LxWxH (mm)	LxWxH (inch)	Cat. No.
8" Cassette Cart - 4 nests	1010x750x1105	40.0x30.0x43.5	4-PCC
8" Cassette Cart - 6 nests	1400x750x1105	55.0x30.0x43.5	6-PCC
