

Product Cleaning Instructions

Palbam Class stainless steel electro-polished furniture is manufactured with great care.

The product has been electropolished, cleaned and wrapped before delivery to you.

To ensure that the product retains its excellent appearance and clean properties the following cleaning procedures are recommended :

- Clean using soft cleanroom approved cloths/wipes only. **Never use** abrasive materials or brushes to clean the products.
- Ideally, distilled water or Iso-Propanol should be used to clean the product.
- Avoid using harsh chemical detergents. It is advisable to test any new chemical you wish to use to clean / sterilise the product, on an undersurface first, to be sure that no damage will result.
- When using a cleaning agent for sterilisation such as DECONEX , it is recommended to wipe afterwards with a clean cloth soaked in DI water, so that there are no chemical residues.
- Dry the product thoroughly after cleaning with a soft, clean, dry, cleanroom cloth, to avoid residual stains.
